- HTML
- CSS
- Javascript
- React
- Tailwind CSS

**Back-End:**
- Node.js
- Express.js
- RESTful APIs

**Databases:**
- MongoDB
- MySQL

**Version Control:**
- Git
- GitHub

**Tools:**
- npm
- Vs Code
- Webpack
- Postman

---

## PROJECTS

### 1. RentHUB [React, PostgreSQL]

This project is a web-based rental application built using **React**, **TypeScript**, and **Vite**. It leverages various modern libraries and frameworks such as **Redux** for state management, **React Query** for data fetching, and **Tailwind CSS** for styling. The application includes features like user authentication via **Google OAuth**, interactive maps using **Leaflet**, and image cropping. It also supports responsive and dynamic UI components through **Shadcn UI** and **Framer Motion**.

### 2. Weather App [React, Tailwind CSS]

The Weather App is a web application built using **React**, **CSS**, and **OpenWeather API**. It allows users to view current weather conditions for various locations, providing accurate updates with a user-friendly interface and responsive design. The project includes features such as location-based weather, hourly forecasts, and dynamic weather icons.
